

# Nexxtmove

The most open and comprehensive electromobility platform

Open ev-platform

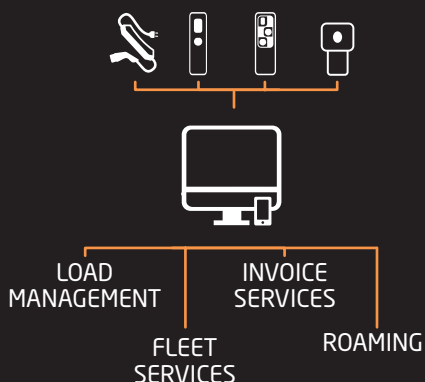

Supports role specific processes and needs

Automated Processes

# Nexxtmove Specifications

## OPEN EV PLATFORM

Whatever the charging point, you can monitor and manage all charging activities with one software.

Next to standard Nexxtmove features, our system offers multiple connections to parallel added-value services such as load management, fleet services, mobility services, invoice services, roaming etc.

## 9-ROLES

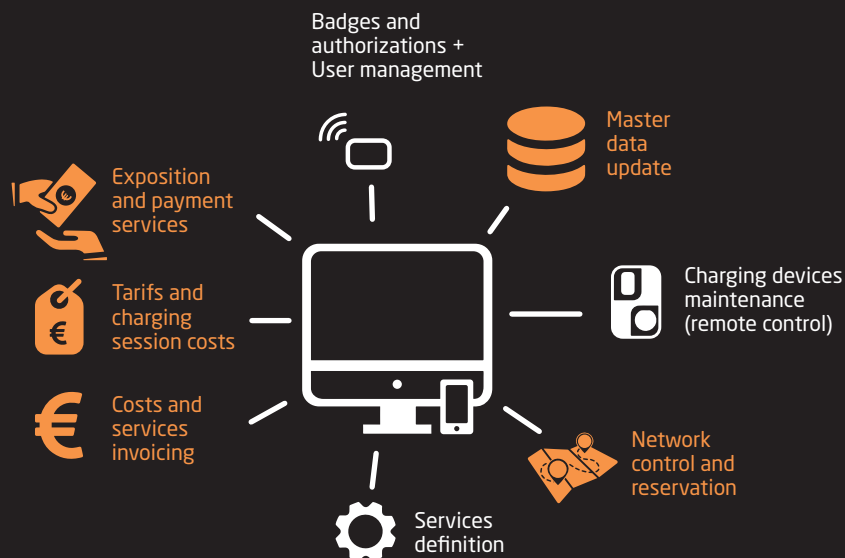

All the different stakeholders playing a role within the large electromobility process get a specific view/features in our platform.

# Nexxtmove Specifications

## AUTOMATED PROCESSES

Nexxtmove offers to those who are providing EV services (mobility services, infrastructure services, consulting services etc.) a powerful tool allowing them to manage the process flows of each of their customers.

Stay current with free continuous upgrades

“We provide technological solutions for electromobility and energy management.”
